

Name: Kenneth Coghill

Class of works: I am writing in support of Class #2 (DVD Region Coding):
Audiovisual works stored on Digital Versatile Disks ("DVDs") that are not
available in Region 1 DVD format and access to which is prevented by
technological measures.

Summary:

As a huge fan of Orbital I bought this DVD looking forward to seeing AND
HEARING this album in 5.1 audio. Lo and behold, it's region encoded for UK /
Europe only. The worst part about this is that if they ever released it in the
states it would have sold a great amount, as I have friends that would love
this disc. I was able to find a non-region encoded DVD player to watch this
disc. Other discs I own with this problem. Mike Oldfield - Tubular Bells II /
III Mike Oldfield - Millenium Bell It's atrocious that I have DVDs that are
region encoded that are not available in this country, yet I can buy them, and
if I agree to get ripped off for an extra couple hundred dollars I can get a
DVD player that can play these discs.

Disc name: Orbital - The Altogether (and others listed below)
